

Benefits of brent® Potter's Wheels

All welded steel construction for strength

1

Modular design connections make upgrades and replacements easy.

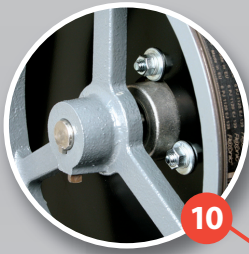

2

Classic Controller keeps wheel speed constant under varying loads. On/off and forward/reverse toggle switches are sealed for protection. Electronic filters quiet operating noise.

3

Sealed bearing and hub assembly for water resistance

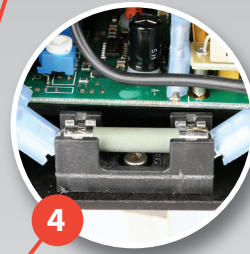

10

Seamless poly-v groove belt for smooth and powerful wheel head performance

9

Safety fuses are easily accessible.

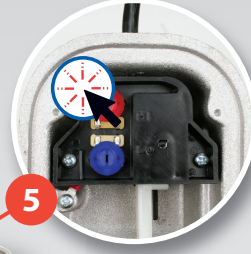

4

High torque motor custom manufactured to brent® specifications

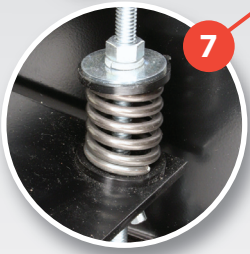

8

Modular components keep maintenance simple.

5

Automatic belt tensioner increases belt life and maintains maximum torque.

7

Convenient foot pedal access for high speed and stop adjustments

6
